Position	Senior IT Project Manager
Potential start date	immediately/flexible
Project end date	30. 06. 2026.
Location	Budapest, District XI. + home office
Capacity	5 days/week
Home office	2 days/week
Description	The project covers phase 3 of a BI roadmap: Data Lake implementation to support high-volume data storage and additional data science-related activities. Standard Microsoft architecture will be used in the project to deliver the framework for long-term operation. Data Warehouse creation - Salesforce, Waste Tracking and SAP are the main source systems at the moment. From these systems the required data need to be transferred to the new Data Warehouse for further use and to create the needed reports.
Requirements	• Project Manager soft skills (strategic thinking, problem solving, communication, conflict management, Agile mindset, strategic thinking) • Experience in multinational or corporate environment • Fluent English • Hard ownership skills
